GBR

This diagram shows how its working on the front end (the part which will be seen by the client.

Thre will be a back end also needs to create, and it will cover the following

1. Integration of Chat/Video chat
1. A data base of registred members for the admin purpose
2. Data base showing the registered periods
3. A list of soon expiring memberships
4. Automatic expiry on due of payments
5. Facility to delete a member manually
6. Facility to add a member manually
7. Total hits on web, daily/ weekly/monthly

And couple of more things will be added when getting on final

Other than this the needy things are

1. Domain name. GBR.com is not available and its already registered by somebody and needs to find some other domain
2. Hosting, there are normal servers and dedicated servers. As its an e commerce site for the safe side of service it needs a dedicated server.
3. Logo for the company.

Anyway the basic things are furnished. We continue further after the confirmation of cost and details. Please update with the diagram, if anything needs to add or delete then we will be able to do that and based on that will do the costing. Upon confirmation we continue further
